

Progression in calculation- Addition

Year Group objectives	Models and Images	Ways in which children could record
<p>Year 1</p> <p><i>Counting and understanding number</i></p> <p>Count reliably at least 20 objects, recognising that when rearranged the number of objects stays the same; estimate a number of objects that can be checked by counting</p> <p>Compare and order numbers, using the related vocabulary; use the equals (=) sign</p> <p>Read and write numerals from 0 to 20 then beyond; use knowledge of place value to position these numbers on a number track and number line</p> <p>Say the number that is 1 more or less than any given number, and 10 more or less for multiples of 10</p> <p><i>Knowing and using number facts</i></p> <p>Derive and recall all pairs of numbers with a total of 10 and addition facts for totals to at least 5; work out the corresponding subtraction facts</p> <p>Recall the doubles of all numbers to at least 10</p> <p><i>Calculating</i></p> <p>Relate addition to counting on; recognise that addition can be done in any order; use practical and informal written methods to support the addition of a one-digit number or a multiple of 10 to a one-digit or two-digit number</p> <p>Understand subtraction as 'take away' and find a 'difference' by counting up; use practical and informal written methods to support the subtraction of a one-digit number from a one-digit or two-digit number and a multiple of 10 from a two-digit number</p> <p>Use the vocabulary related to addition and subtraction and symbols to describe and record addition and subtraction number sentence</p>	<p><i>Continue with images from Foundation Stage as appropriate to the children. Children should have opportunities to use bead strings and number lines in a variety of contexts.</i></p> <p>How many oranges do you think there are in this box?</p>  <p>...I think about 17...</p>  <p>Counting ITP</p> <p>9 children want school dinners then 5 more children say they want dinner. How many dinners shall we order today?</p> <p>Using bead string/dienes/Cuisenaire/counting camels</p>  <p>Number facts ITP</p>   <p>Twenty Cards ITP</p>  <p>Counting on and back ITP</p>  <p>$10 = 7 + 3$</p> <p>Use bead strings to 20, then 100</p>	<p>$5 + 9 = 14$</p> <p>Put the larger number first</p>   <p>I have 9 and now I need 5</p> <p>On a structured number line for more able</p>  <p>Begin to draw own empty number line</p>  <p>Adding 5 mentally or in one leap on the number line</p>  <p>$24 + 30$</p> <p>Children can explain or model adding 30 to 24 mentally, using bead strings or number lines</p>  <p>$= 54$</p>

Progression in calculation- Addition

Year Group objectives	Models and images	Ways in which children could record
<p>Year 2</p> <p>Counting and understanding number</p> <p>Read and write two-digit and three-digit numbers in figures and words; describe and extend number sequences and recognise odd and even numbers</p> <p>Count up to 100 objects by grouping them and counting in tens, fives or twos; explain what each digit in a two-digit number represents, including numbers where 0 is a place holder; partition two-digit numbers in different ways, including into multiples of 10 and 1</p> <p>Order two-digit numbers and position them on a number line; use the greater than (>) and less than (<) signs</p> <p>Estimate a number of objects; round two-digit numbers to the nearest 10</p> <p>Knowing and using number facts</p> <p>Derive and recall all addition and subtraction facts for each number to at least 10, all pairs with totals to 20 and all pairs of multiples of 10 with totals up to 100</p> <p>Understand that halving is the inverse of doubling and derive and recall doubles of all numbers to 20, and the corresponding halves</p> <p>Use knowledge of number facts and operations to estimate and check answers to calculations</p> <p>Calculating</p> <p>Add or subtract mentally a one-digit number or a multiple of 10 to or from any two-digit number; use practical and informal written methods to add and subtract two-digit numbers</p> <p>Understand that subtraction is the inverse of addition and vice versa; use this to derive and record related addition and subtraction number facts ITP mber sentences</p> <p>Use the symbols +, -, ×, ÷ and = to record and interpret number sentences involving all four operations; calculate the value of an unknown in a number sentence (e.g. □ + 2 = 6, 30 - □ = 24)</p>	<p>There are 23 boys and 12 girls in the class. How many children are there?</p> <p>On a bead string</p> $23 + 10 + 2 = 35$   <p>15 + 5 = 20</p> <p>Building on known number facts - I know 5 and 5 make 10 so 15 and 5 make 20</p>  <p>14 + 6 = 20</p> <p>Number Facts ITP</p>  <p>Counting on and back ITP 56 + 30</p>  <p>Ordering numbers ITP</p> <p>Also use Number lines, Cuisenaire, Dienes, Numicon when appropriate</p>	<p>Keep the largest number whole and partition smaller number</p> $12 + 23 = 35$ <p>partitioning one number and explaining thinking</p> $23 + 10 + 2 = 33 + 2 = 35$ <p>using a structured number line</p>  <p>using an empty number line</p>   <p>15p each bar How much for all four bars?</p> <p>Explain working mentally or use a structured number line or an empty number line or show jottings to work out what they spent on two items.</p>

Progression in calculation- Addition

Year Group objectives	Models and images	Ways in which children could record
<p>Year 3</p> <p><i>Counting and understanding number</i></p> <p>Read, write and order whole numbers to at least 1000 and position them on a number line; count on from and back to zero in single-digit steps or multiples of 10</p> <p>Partition three-digit numbers into multiples of 100, 10 and 1 in different ways</p> <p>Round two-digit or three-digit numbers to the nearest 10 or 100 and give estimates for their sums and differences</p> <p><i>Knowing and using number facts</i></p> <p>Derive and recall all addition and subtraction facts for each number to 20, sums and differences of multiples of 10 and number pairs that total 100</p> <p>Use knowledge of number operations and corresponding inverses, including doubling and halving to estimate and check calculations</p> <p><i>Calculating</i></p> <p>Add or subtract mentally combinations of one-digit and two-digit numbers</p> <p>Develop and use written methods to record, support or explain addition and subtraction of two-digit and three-digit numbers</p>	<p>Continue to use 100 bead strings to support children using known facts.</p> <p>$3 + 7 = 10$ $3 + 10 = 13$</p>  <p>$13 + 7 = 20$ $13 + 10 = 23$</p>  <p>$30 + 70 = 100$</p>  <p>$33 + 67 = 100$</p>  <p>Encourage children to add mentally by using real life contexts and money.</p> <p>How much would a Freddo bar and a chocolate bar cost altogether? What if we bought two of each?</p> <p>24p 15p</p>   <p>also Measuring Scales and Counting On and Back ITPs</p>  <p>Measuring cylinder ITP</p>  <p>Number Spinners ITP</p>	<p>Keep the largest number whole and partition smaller number</p> <p>$37 + 28 = 65$</p> <p>On a structured number line</p> <p>$37 + 20 + 3 + 5 = 65$</p>  <p>Bridging through 100</p> <p>$53 + 86 = 139$</p>  <p>or</p>  <p>Using known number facts</p> <p>$35 + 19 = 54$</p>  <p>By now children should be encouraged to choose their own methods of calculating using the empty number line – methods that reflect their thinking</p>

Progression in calculation- Addition

Year Group objectives

Year 4

Counting and understanding number

Recognise and continue number sequences formed by counting on or back in steps of constant size

Partition, round and order four-digit whole numbers; use positive and negative numbers in context and position them on a number line; state inequalities using the symbols $<$ and $>$ (e.g. $-3 > -5$, $-1 < +1$)

Use decimal notation for tenths and hundredths and partition decimals; relate the notation to money and measurement; position one-place and two-place decimals on a number line

Knowing and using number facts

Use knowledge of addition and subtraction facts and place value to derive sums and differences of pairs of multiples of 10, 100 or 1000

Identify the doubles of two-digit numbers; use these to calculate doubles of multiples of 10 and 100 and derive the corresponding halves

Use knowledge of rounding, number operations and inverses to estimate and check calculations

Calculating

Add or subtract mentally pairs of two-digit whole numbers (e.g. $47 + 58$, $91 - 35$)

Refine and use efficient written methods to add and subtract two- and three-digit whole numbers and £ p

Use a calculator to carry out one and two step calculations involving all 4 operations, recognise negative numbers on the display, correct mistaken entries and interpret display correctly in the context of money

Models and images

Model calculation in context

A T.V. programme starts at 3.45pm and lasts for 1hr 45 minutes. What time did it end?

Use bead strings to support decimal understanding

Measuring Cylinder ITP

Decimal Number Line ITP

Scales ITP

Ways in which children could record

Keep the largest number whole and partition smaller number

$$187 + 36 = 223$$

Money and decimals

$$£3.23 + £2.54$$

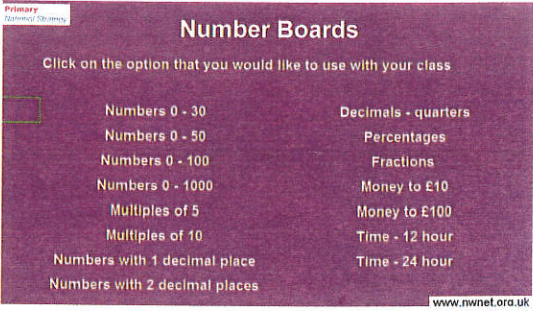

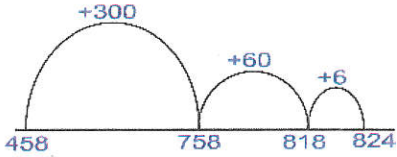

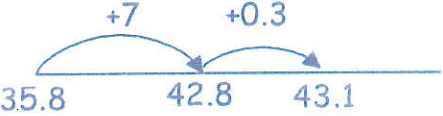

Using a written method when ready for 2, 3 digit numbers and for decimals

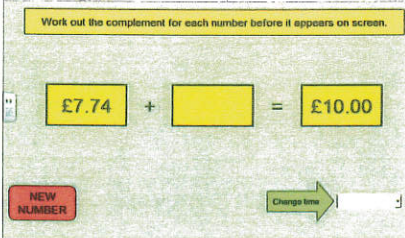

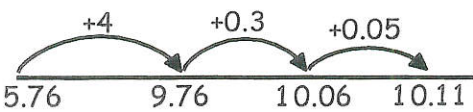

$$\begin{array}{r} 366 \\ + 458 \\ \hline 14 \\ 110 \\ 700 \\ \hline 824 \end{array}$$

Children should be taught to *look at the numbers* in calculations to determine the best method to use to solve them

Progression in calculation- Addition

Year Group objectives	Models and images	Ways in which children could record																									
<p>Year 5</p> <p><i>Counting and understanding number</i></p> <p>Count from any given number in whole-number and decimal steps, extending beyond zero when counting backwards; relate the numbers to their position on a number line</p> <p>Explain what each digit represents in whole numbers and decimals with up to two places, and partition, round and order these numbers</p> <p><i>Knowing and using number facts</i></p> <p>Use knowledge of place value and addition and subtraction of two-digit numbers to derive sums and differences and doubles and halves of decimals (e.g. 6.5 ± 2.7, half of 5.6, double 0.34)</p> <p>Use knowledge of rounding, place value, number facts and inverse operations to estimate and check calculations</p> <p><i>Calculating</i></p> <p>Extend mental methods for whole number calculations, for example to subtract one near multiple of 1000 from another (eg. 6070-4097)</p> <p>Use efficient written methods to add and subtract whole numbers and decimals with up to two places</p> <p>Use a calculator to solve problems including those involving decimals and interpret the display correctly in the context of measurement</p>	<p>It is important that children do not feel that the compact method of recording a calculation is 'better' than using mental strategies, jottings or using a calculator. Children need to look at a calculation and decide what the most efficient and reliable approach is.</p> <p>Teachers should not spend too long teaching this method, if children can understand it and identify when to use it fairly quickly then it will be useful to them.</p> <p>If children struggle, continuing to use number lines and jottings will be more efficient and reliable.</p> <table border="1" data-bbox="819 722 1211 922"> <tr><td>79</td><td>67.4</td><td>63.4</td><td>62.8</td><td>21.8</td></tr> <tr><td>80</td><td>43.8</td><td>19.1</td><td>47</td><td>40.5</td></tr> <tr><td>13</td><td>33.9</td><td>85.6</td><td>51.7</td><td>72.8</td></tr> <tr><td>30.2</td><td>96</td><td>2.3</td><td>63.6</td><td>21.9</td></tr> <tr><td>11.9</td><td>28.1</td><td>13.4</td><td>26.4</td><td>47.1</td></tr> </table> <p>Number Boards Spreadsheet</p>  <p>The Number Boards help sheet shows range of boards available</p>	79	67.4	63.4	62.8	21.8	80	43.8	19.1	47	40.5	13	33.9	85.6	51.7	72.8	30.2	96	2.3	63.6	21.9	11.9	28.1	13.4	26.4	47.1	<p>$366 + 458$</p> <p>Empty number line</p>  <p>Compact written method</p> $\begin{array}{r} 366 \\ + 458 \\ \hline 824 \\ \hline 11 \end{array}$ <p>Adding decimals, keep the largest number whole and partition and add the smaller number</p> <p>$35.8 + 7.3 = 35.8 + 7 + 0.3$</p> 
79	67.4	63.4	62.8	21.8
